VEDANT NILESH PAWAR

+91 9322347835 vedantpawar434@gmail.com Portfolio LinkedIn GitHub

PROFESSIONAL SUMMARY:

Curious and self-motivated AI & Data Science undergraduate who enjoys solving real-world problems through technology. I thrive in environments that encourage learning, innovation, and ownership, and I'm always eager to explore emerging technologies while strengthening my technical, analytical, and leadership skills.
You can check out project video's on my LinkedIn.

EDUCATION:

K.J. Somaiya Institute of Technology (2024–Present)
B.Tech. Artificial Intelligence & Data Science - CGPA: 9.0 / 10 (Sem 4)
Class XII – B.K. Birla College, Kalyan (2023–24) - 73%
Class X – Panna English High School (2021–22) - 92%

PROFESSIONAL EXPERIENCE:

LLM Post-Training Intern | Ethara AI **Mar 2026 – May 2026 | Remote**

- Evaluated and annotated LLM responses for quality, accuracy, instruction following, and safety.
- Performed prompt evaluation and response validation to improve AI output consistency.
- Collaborated with cross-functional teams to enhance model reliability and user experience.

Operations & Client Coordination | Madheshiya Homes **Dec 2025 – Jan 2026 | Offline**

- Managed office operations, documentation, and client coordination.
- Guided prospective homebuyers by explaining property features, resolving queries, and helping them make informed purchasing decisions.
- Scheduled visits and streamlined communication between clients and internal teams.

Team Leader – Data Science Intern | InternPro **Jun 2025 – Jul 2025 | Remote**

- Led a 10-member team on a Reddit Trends Analysis project.
- Performed data cleaning and exploratory data analysis (EDA) using Python, Pandas, and NumPy.
- Created data visualizations using Matplotlib and Seaborn to generate actionable insights.

PROJECT:

PreDoc – AI-Powered Preventive Healthcare Mobile App

- Developed an offline-first AI healthcare app for early disease-risk prediction and health monitoring.
- Integrated an AI health assistant with symptom analysis, medication reminders, and health score prediction.
- Tech: Flutter, Firebase, Python, TensorFlow, YAMNet, OpenCV.

PARKVUE

- Developed a smart parking management system with OTP authentication and AI - number plate recognition.
- Built an admin dashboard for parking analytics, revenue monitoring, and vehicle management.
- Tech: HTML, CSS, JavaScript, TypeScript, Java, Supabase, Gemini Vision, Vercel.

Reddit Trends Analysis (Team Lead – InternPro)

- Led a team of 10 interns to analyze 6,000+ Reddit posts using Python.
- Performed exploratory data analysis (EDA) and created visualizations to identify discussion trends.
- Tech: Python, Pandas, NumPy, Matplotlib, Seaborn.

Music Web Player

- Developed a responsive music web player with user authentication and playlist management.
- Tech: HTML, CSS, JavaScript, Vercel.

SKILLS:

Programming Languages: Python, Java, JavaScript, C, SQL
AI / Machine Learning: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, LLM Evaluation & Post-Training, Prompt Engineering, Exploratory Data Analysis (EDA)
Web & Mobile Development: HTML, CSS, Flutter, Firebase, Firestore, Supabase, MongoDB
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Vercel
Core Skills: Problem Solving, Leadership, Team Collaboration, Communication, Client Coordination

EXTRACURRICULAR ACTIVITIES:

Chess Tournament Organizer (Solely) - K.J.S.I.T. GRANDMASTER 2026
Marketing Team Member | S4DS, KJSIT (Jun 2025 – Jun 2026)
D.C.T. Team Member | IEEE KJSIT (Jun 2025 – Present)
